

Workshop ID: P1

Title:

ISR Paper Development Workshop

1) Short Description:

As part of its outreach efforts and to encourage submissions from the ECIS community to [Information Systems Research \(ISR\)](#), the journal is pleased to announce its first-ever paper development workshop at ECIS.

Interested authors are invited to submit papers for possible inclusion in the workshop. Submitted papers should not be under review. We plan to accept between 15 and 20 papers that are of high quality and/or have the potential to develop into high-quality submissions targeted toward the leading journals of the IS discipline. Please note that not all submissions received can be accepted. Papers that are not accepted will not receive feedback.

Submissions can be on any topic and may use any research methodology (qualitative, quantitative, design, multi-method, etc.). Papers related to AI are especially welcome.

The selected papers will be mentored by at least two members of the ISR Editorial Board. Please note that the workshop is not associated with any publication. The goal is to offer feedback to the authors that can help enhance the quality of the paper as it is prepared for submission to a suitable journal. Authors do not have an obligation to submit the paper to ISR just because it has been accepted and discussed in the ISR Paper Development Workshop.

The length of the papers submitted to the workshop should not exceed 25 pages (double-spaced, 12 font)
